

BOLINA BOOMS®

LAMOR

ENVIRONMENT

- Permanent Debris Booms
- Litter Fence Booms
- Permanent Pollution Booms

Our unique debris boom design allows the current to automatically deflect all the surface debris to a collection point without it being obstructed by the floats because the buoyancy and ballast are on the downstream side of the curtain.

ANTI-TERRORIST

- Port Security Booms
- Airport Security Booms
- Perimeter Defence Booms

The widest range of waterside security barriers available - from power plants to palaces and from NATO Summits to London 2012 Olympics, our booms are designed to either deter or prevent unauthorized access.

SAFETY

- Rope Safety Booms
- Chain Safety Booms
- Traffic & Canoe Booms

We are the market leaders in waterway safety for protecting casualties from weirs and sluices, our booms perform all year round without requiring attention that is why most waterway authorities specify Bolina Booms.
